| <b>Safety-related parameters</b> |                                 |                                                                                                               |
|                                  | MTTF <sub>D</sub>               | 101 years                                                                                                     |
|                                  | DC <sub>avg</sub>               | 0%                                                                                                            |

<sup>1)</sup> In ambient light, max. 1 klx of constant light.

<sup>2)</sup> Unique up to 150 m.

<sup>3)</sup> Average service life of 50,000 h at T<sub>A</sub> = +25 °C.

## Interfaces

|                                   |                      |
|-----------------------------------|----------------------|
| <b>Digital output</b>             |                      |
| Number                            | 2 <sup>1)</sup>      |
| Type                              | NPN                  |
| Maximum output current $I_A$      | $\leq 100$ mA        |
| <b>Multifunctional input (MF)</b> | NPN <sup>2) 3)</sup> |
| <b>Hysteresis</b>                 | $\pm 6$ %            |

<sup>1)</sup> HIGH =  $U_V$  / LOW =  $< 2,5$  V; active HIGH / aktive LOW konfigurierbar.

<sup>2)</sup> Refer to function MF input.

<sup>3)</sup> HIGH =  $U_V$  / LOW =  $< 2$  V; active LOW.

## Electronics

|                                        |                                                                                             |
|----------------------------------------|---------------------------------------------------------------------------------------------|
| <b>Supply voltage <math>U_B</math></b> | DC 10 V ... 30 V, reverse polarity protected<br>$U_V \geq$ DC 24 V for devices with heating |
| <b>Power consumption</b>               | Typ. 22 W                                                                                   |
| <b>Ripple</b>                          | 5 V <sub>pp</sub> <sup>1)</sup>                                                             |
| <b>Initialization time</b>             | 500 ms                                                                                      |
| <b>Enclosure rating</b>                | IP65                                                                                        |
| <b>Protection class</b>                | II <sup>2)</sup>                                                                            |
| <b>Connection type</b>                 |                                                                                             |
|                                        | Male connector                                                                              |

<sup>1)</sup> May not fall short of or exceed  $V_S$  tolerances.

<sup>2)</sup> Reference voltage DC 32 V.

## Mechanics

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
