Connection diagram Cd-313

Connection diagram

Concept of operation Teach-in dynamic

1. Position background

Press and hold SET button.
Emitted light turns white.

2. Move at least one repeat length using the light spot

Hold down SET button.

Release SET button.

Concept of operation Teach-in static

1. Position mark

Press and hold SET button > 1 s.
Red emitted light and yellow
LED flash.

2. Position background

Press and hold SET button > 1 s.
Yellow LED goes out.
Optimum emitted light is
selected.

Note

The bar display visualizes the detection reliability during teach-in. The more LEDs that illuminate, the better the teach-in:

1 LED illuminates = operation not reliable – lowest contrast difference

≤ 4 LEDs illuminate = operation OK – sufficient contrast difference

> 4 LEDs illuminate = reliable operation – high contrast difference

Example

Switching characteristics

Light/dark setting is defined using teach-in sequence.

The switching threshold is set in the center between the background and the mark.

Teach-in and the light/dark setting can also be configured using an external control signal.
