Detailed technical data

Safety-related parameters

$MTTF_D$ (mean time to dangerous failure)	275 years (EN ISO 13849-1) ¹⁾
---	--

¹⁾ This product is a standard product and does not constitute a safety component as defined in the Machinery Directive. Calculation based on nominal load of components, average ambient temperature 40 °C, frequency of use 8760 h/a. All electronic failures are considered hazardous. For more information, see document no. 8015532.

Performance

Pulses per revolution	1 1800 ¹⁾
Resolution in pulses/mm	0.125 mm/pulse to 304.8 mm/pulse (type-dependent)
Measuring step	90° electric/pulses per revolution
Measuring step deviation	± 18°, / pulses per revolution
Error limits	Measuring step deviation x 3
Duty cycle	0.5 ± 5 %
Initialization time	< 5 ms ²⁾

¹⁾ Available pulses per revolution see type code.

Interfaces

Communication interface	Incremental
Communication Interface detail	TTL / HTL
Parameterising data	DIP switch, selectable output

Electronics

Operating power consumption (no load)	120 mA
Connection type	Male connector, M12, 8-pin, universal ¹⁾
Pulses per revolution	✓

¹⁾ The universal connection is rotatable so that it is possible to position the conector in the radial or axial direction.

 $^{^{\}rm 2)}\,{\rm Valid}$ positional data can be read once this time has elapsed.

Output voltage	✓
Direction of rotation	1
Power consumption max. without load	≤ 1.25 W
Supply voltage	4.75 V 30 V
Load current max.	≤ 30 mA, per channel
Maximum output frequency	60 kHz
Reference signal, number	1
Reference signal, position	180°, electric, gated with A
Reverse polarity protection	√
Short-circuit protection of the outputs	1

 $^{^{1)}}$ The universal connection is rotatable so that it is possible to position the conector in the radial or axial direction.

¹⁾ The surface of a measuring wheel is subject to wear. This depends on contact pressure, acceleration behavior in the application, traversing speed, measurement surface, mechanical alignment of the measuring wheel, temperature, and ambient conditions. We recommend you regularly check the condition of the measuring wheel and replace as required.

Ambient data

ЕМС	According to EN 61000-6-2 and EN 61000-6-3

 $^{^{1)}}$ When the mating connector is installed and the DIP switch door is sealed with the encoder housing.

²⁾ Based on an encoder with a plug connector output and urethane rollers, no mounting necessary (arm mount).

 $^{^{}m 3)}$ Only applies to variants with spring arm mounting.

Enclosure rating	IP65 ¹⁾
Permissible relative humidity	90 % (Condensation not permitted)
Operating temperature range	-30 °C +70 °C
Storage temperature range	-40 °C +75 °C
Resistance to shocks	100 g (EN 60068-2-27)
Resistance to vibration	30 g, 10 Hz 2,000 Hz (EN 60068-2-6)

 $^{^{1)}}$ When the mating connector is installed and the DIP switch door is sealed with the encoder housing.

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
