#### Detailed technical data

#### **Features**

| Special device            | J  |
|---------------------------|--|
| Specialty                 | Rotatable spring arm, with M6 thread for mounting in the application Without measuring wheel Cable, 8-wire, 2.3 m with JST connector, type PAP-08V-S |
| Standard reference device | DBS50E-S5AL01024   |

#### Safety-related parameters

| MTTF <sub>D</sub> (mean time to dangerous failure) | 600 s (EN ISO 13849-1) 1) |
|--|---------------------------|
|  |                           |

<sup>1)</sup> This product is a standard product and does not constitute a safety component as defined in the Machinery Directive. Calculation based on nominal load of components, average ambient temperature 40°C, frequency of use 8760 h/a. All electronic failures are considered hazardous. For more information, see document no. 8015532

#### Performance

| Pulses per revolution    | 1,024   |
|--------------------------|---|
| Measuring step deviation | ± 18° / pulses per revolution   |
| Error limits             | $\pm$ 54°, $\pm$ 4 mm/m, subject to the measuring wheel (wheel + surface) |
| Duty cycle               | ≤ 0.5 ± 5 %   |
| Initialization time      | < 3 ms  |

#### Interfaces

| Communication interface        | Incremental  |
|--------------------------------|--------------|
| Communication Interface detail | TTL / RS-422 |
| Number of signal channels      | 6-channel    |

#### **Electronics**

| Operating power consumption (no load) | 50 mA   |
|---------------------------------------|---|
| Connection type                       | Special version   |
| Connection type Detail                | Cable, 8-wire, 2.3 m with JST connector, type PAP-08V-S |
| Supply voltage                        | 4.5 V 5.5 V   |
| Load current max.                     | 30 mA   |
| Maximum output frequency              | ≤ 300 kHz   |

 $<sup>^{1)}</sup>$  The short-circuit rating is only given if Us and GND are connected correctly.

| Reference signal, number                | 1   |
|---|---|
| Reference signal, position              | 90°, electric, logically gated with A and B |
| Reverse polarity protection             | -   |
| Short-circuit protection of the outputs | <b>✓</b> ¹)                                 |

 $<sup>^{1)}\,\</sup>mbox{The short-circuit rating is only given if Us and GND are connected correctly.$ 

#### Mechanics

| Mass                                    | + 300 g                               |
|---|---------------------------------------|
| Encoder material                        |                                       |
| Shaft                                   | Stainless steel                       |
| Flange                                  | Aluminum                              |
| Housing                                 | Aluminum                              |
| Cable                                   | PVC                                   |
| Spring arm mechanism material           |                                       |
| Spring element                          | Spring steel, anti-corrosive          |
| Start up torque                         | + 0.9 Ncm (at 20 °C)                  |
| Operating torque                        | 0.6 Ncm (at 20 °C)                    |
| Maximum operating speed                 | 3,000 min <sup>-1</sup> <sup>1)</sup> |
| Bearing lifetime                        | 2 x 10^9 revolutions                  |
| Maximum travel/deflection of spring arm | 300 m                                 |
| Recommended spring deflection           | ≤ 14 mm                               |

 $<sup>^{1)}</sup>$  No permanent operation. Decreasing signal quality.

#### Ambient data

| EMC                           | According to EN 61000-6-2 and EN 61000-6-3 (class A) |
|-------------------------------|--|
| Enclosure rating              | IP65   |
| Permissible relative humidity | 90 % (Condensation not permitted)                    |
| Operating temperature range   | -30 °C +85 °C (-35 °C +95 °C on request)             |
| Storage temperature range     | -40 °C +100 °C, without package                      |
| Resistance to shocks          | 100 g, 6 ms (EN 60068-2-27)                          |
| Resistance to vibration       | 20 g, 10 Hz 2,000 Hz (EN 60068-2-6)                  |

#### Certificates

| EU declaration of conformity  | ✓        |
|---|----------|
| UK declaration of conformity  | ✓        |
| ACMA declaration of conformity  | ✓        |
| China RoHS  | ✓        |
| cRUus certificate   | ✓        |
| Information according to Art. 3 of Data Act (Regulation EU 2023/2854) | <b>✓</b> |

#### Classifications

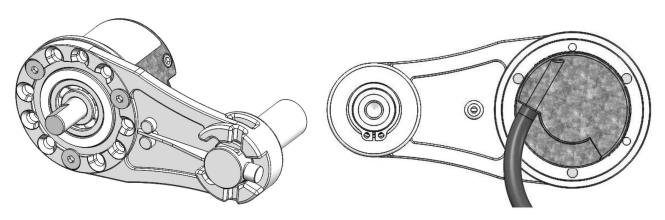

| ECLASS 5.0   | 27270501 |

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
