### Detailed technical data

#### Features

<b>Specialty</b>	<p>SPEETEC closes the gap between tactile measuring wheel systems and complex laser Doppler sensors – and is suitable for almost all surfaces and objects thanks to the non-contact measurement that uses no measuring elements. This opens up new fields of application in motion monitoring.</p> <p>NCV50E is the ideal solution for OEM customers who define the best mounting position for their application and can ensure precise mounting. The systematic errors of the application can be determined by performing a reference measurement after mounting. If this is not possible, the NCV50B model should be preferred.</p> <p>Non-contact measurement on moving objects without measuring elements.</p> <p>Class 1 laser</p>
------------------	---

#### Safety-related parameters

<b>MTTFd: mean time to dangerous failure</b>	33 years <sup>1)</sup>
--	------------------------

<sup>1)</sup> This product is a standard product and does not constitute a safety component as defined in the Machinery Directive. Calculation based on nominal load of components, average ambient temperature 40 °C, frequency of use 8760 h/a. All electronic failures are considered hazardous. For more information, see document no. 8015532.

#### System

<b>Light source</b>	1 continuous beam laser <sup>1)</sup>
<b>Wave length</b>	850 nm
<b>Laser class</b>	1 (IEC 60825-1:2014) <sup>2)</sup>
<b>Type of light</b>	Invisible infrared light
<b>Typ. measurement field size (distance)</b>	2 mm x 1.5 mm (at 50 mm) 2 mm x 1.5 mm (at 45 mm) 2 mm x 1.5 mm (at 55 mm)
<b>Laser power (per laser)</b>	0.78 mW <sup>3)</sup>

<sup>1)</sup> L10 ≥ 32,500 h (not temperature-dependent). The lasers are always on when the sensor is supplied with voltage. To increase the service life of the sensor, we recommend completely disconnecting the sensor from the voltage supply when it is not needed. No warranty claims relating to the reaching of the service life of the laser will be accepted.

<sup>2)</sup> Do not intentionally look into the laser beam. Never point the laser beam at people's eyes.

<sup>3)</sup> The device must not be operated if the screen is damaged or missing.

## Performance

<b>Nominal measuring distance</b>	50 mm
<b>Static mounting tolerance</b>	Ca. $\pm 5$ mm <sup>1)</sup>
<b>Possible static measuring distance</b>	30 ... 100 mm <sup>2)</sup>
<b>Direction of movement</b>	1D, x-direction
<b>Start/stop</b>	Not recommended
<b>Movement detection</b>	Bidirectional
<b>Measuring increment (<math>\mu\text{m}</math>/pulse)</b>	4 (At 90° electrical)
<b>Speed measuring range</b>	$> 0$ m/s ... 10 m/s <sup>3)</sup>
<b>Permissible acceleration</b>	$\leq 30$ m/s <sup>2</sup>
<b>Accuracy</b>	Measurement accuracy 0.72% <sup>4)</sup>
	Repeatability 0.1 % <sup>5)</sup>
<b>Internal sampling rate</b>	330 $\mu\text{s}$
<b>Latency</b>	2.9 ms

<sup>1)</sup> Mounting the device closer than the specified measuring distance will not affect the accuracy of the measurement for suitable materials. Operation outside of the tolerance is possible with restrictions.

<sup>2)</sup> The possible measuring distance depends on the material and must be identified in each case for the material used in the application, see the "Permissible measuring distance" table. The static mounting tolerance is included in the range mentioned above and is not additionally available.

<sup>3)</sup> No continuous operation  $< 0.1$  m/s recommended.

<sup>4)</sup> Error limit for systematic measurement deviation in accordance with DIN 1319-1:1995. Valid between 0.2 m/s ... 10 m/s. The achievable measurement accuracy depends on the accuracy of installation. See "Permissible deviations from nominal alignment".

<sup>5)</sup> Maximum permissible measurement deviation in accordance with DIN 1319-1:1995 under constant conditions. Valid between 0.2 m/s ... 10 m/s, averaged over 0.25 m measuring length.

## Electronics

<b>Supply voltage</b>	12 V ... 30 V
<b>Communication interface</b>	TTL / HTL
<b>Factory setting</b>	Factory setting: output level TTL
<b>Output frequency</b>	$\leq 625$ kHz
<b>Connection type</b>	Male connector, M12, 8-pin, A-coded <sup>1)</sup>
<b>Parameterization and diagnostic interface with digital input and output</b>	Yes
<b>Parameterising data</b>	TTL or HTL electrical interface Length of the measuring step Direction of movement forward or backward Functionality of the digital inputs and outputs Logic function "Deactivate incremental signal" Logic function "Digital trigger output active after defined length" Customer correction factor to compensate for assembly tolerances
<b>Available diagnostics data</b>	Operating hour counter Sensor temperature Current speed value Current signal-to-noise ratios Indicators for measurement errors due to reflections State of the digital inputs and outputs

<sup>1)</sup> Observe the maximum length of cable: e.g. 20 m at a resolution of 4  $\mu\text{m}$  and 1 m/s or 2 m at a resolution of 4  $\mu\text{m}$  and 5 m/s: The frequency is calculated differentially with 4-fold evaluation as follows: Frequency = (speed/resolution) / 4; Example: (5.0 m/s / 4  $\mu\text{m}$ ) / 4 = 312.5 kHz; maximum frequency 625 kHz.

<sup>2)</sup> Short-circuit to another channel or GND permissible for a maximum of 30 s. No protection in the case of a short-circuit channel of U<sub>S</sub>.

<sup>3)</sup> Digital output DO can have an undefined state during this time.

<b>Power consumption</b>	< 8 W
<b>Load current</b>	≤ 30 mA, per channel
<b>Reverse polarity protection</b>	✓
<b>Protection class</b>	III according to DIN EN 61140
<b>Short-circuit resistant outputs</b>	✓ <sup>2)</sup>
<b>Initialization time</b>	Max. 3 s <sup>3)</sup>

<sup>1)</sup> Observe the maximum length of cable: e.g. 20 m at a resolution of 4 µm and 1 m/s or 2 m at a resolution of 4 µm and 5 m/s: The frequency is calculated differently with 4-fold evaluation as follows: Frequency = (speed/resolution) / 4; Example: (5.0 m/s / 4 µm) / 4 = 312.5 kHz; maximum frequency 625 kHz.

<sup>2)</sup> Short-circuit to another channel or GND permissible for a maximum of 30 s. No protection in the case of a short-circuit channel of U<sub>S</sub>.

<sup>3)</sup> Digital output DO can have an undefined state during this time.

### Mechanics

<b>Dimensions</b>	140 mm x 95 mm x 32.5 mm (without plug)
<b>Weight</b>	400 g
<b>Material</b>	
Housing	Aluminum
Screen	PMMA
Plug insert	PA66, copper-zinc alloy (CuZn)
<b>Permissible angle</b>	
Permissible pitch angle	≤ ± 0.2° <sup>1)</sup>
Permissible yaw angle	≤ ± 1.5° <sup>1)</sup>
Permissible roll angle	≤ ± 10° <sup>1)</sup>

<sup>1)</sup> Exceeding these values will result in a higher systematic measurement error, see "Permissible deviations from nominal alignment".

### Ambient data

<b>EMC</b>	EN 61000-6-2, EN 61000-6-3
<b>Enclosure rating</b>	IP65 (EN 60529) <sup>1)</sup> IP67 (EN 60529) <sup>1)</sup>
<b>Permissible relative humidity</b>	70 % <sup>2)</sup>
<b>Temperature</b>	
Operating temperature range	0 °C ... +45 °C <sup>3)</sup>
Storage temperature range	-32 °C ... +60 °C, without package
<b>Resistance</b>	
Resistance to shocks	30 g, 6 ms (EN 60068-2-27)
Resistance to vibration	20 g, 10 Hz ... 2,000 Hz (EN 60068-2-6)

<sup>1)</sup> For suitable mating connector and correct mounting of the mating connector.

<sup>2)</sup> Condensation on laser modules and screen not permitted.

<sup>3)</sup> If the permissible temperature range is exceeded, the sensor switches off the laser to protect it against damage. No signal is outputted in this case. The variant with parameterization and diagnostic functions offers the option of monitoring the internal temperature and therefore the reserves up until the point of switching off.

### Classifications

Diagrams Signal outputs for electrical interfaces TTL and HTL with forward material movement (see assembly specifications)

The measuring step corresponds to 90° electrical. The specified resolution, e.g. 4 µm, can only be achieved if the counter card is scanned 4 times. This ensures each signal edge within the 360° el. period (rising A, rising B, falling A, falling B) is counted.

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

**For us, that is “Sensor Intelligence.”**

## WORLDWIDE PRESENCE:
