| <b>License type</b>          | Single                                                                                                                                                                                                                                                                                                                                                         |
| <b>License description</b>   | "Single user" license means that the customer is entitled to use the software at one workstation.                                                                                                                                                                                                                                                              |
| <b>Number of usage units</b> | Unlimited                                                                                                                                                                                                                                                                                                                                                      |
| <b>Number of licenses</b>    | 5                                                                                                                                                                                                                                                                                                                                                              |
| <b>Description</b>           | The Safety Designer makes it possible to compare two configuration files with each other so that safety-relevant changes can be tracked more easily. This reduces the verification effort. The Configuration Comparison Re-Import premium function makes it possible to import a modified configuration into the master project after successful verification. |
| <b>Supported products</b>    | microScan3<br>nanoScan3<br>outdoorScan3                                                                                                                                                                                                                                                                                                                        |

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
