

# Commissioning Lector

Installation and commissioning

ENGINEERING AND INTEGRATION

**SICK**  
Sensor Intelligence.

### Ordering information

Type	part no.
Commissioning Lector	1608206

Other models and accessories → [www.sick.com/Installation\\_and\\_commissioning](http://www.sick.com/Installation_and_commissioning)

### Detailed technical data

#### Features

<b>Product version</b>	Ident commissioning
<b>Product area</b>	Image-based code readers
<b>Prerequisites</b>	<p>Feasibility analysis, taking into account the specifications for the SICK product</p> <p>Definition of the required functions</p> <p>SICK product is mounted, electrically connected, and connected to the plant</p> <p>SICK product is configured with factory settings</p> <p>Supply voltage and host connection are available at the installation site</p> <p>SICK product and programming interface are easily accessible without tools</p> <p>Provision of test objects and barcodes as reference</p> <p>Availability of the plant for the duration of the service</p>
<b>Range of services, brief</b>	<p>Inspection of connection, fine adjustment, optimization of parameters of SICK product as well as tests</p> <p>Set-up of previously defined functions of possible illumination, code configuration, trigger and digital inputs, interfaces and digital outputs as well as data processing</p>
<b>Range of services</b>	<p>Preliminary analysis of possible influences of ambient conditions</p> <p>Inspection and possible correction of wiring and connection of the SICK product</p> <p>Alignment and fine adjustment of the SICK product</p> <p>Setting of application-specific parameters, e.g. possible illumination, code configuration, trigger and digital inputs, interfaces and digital outputs, data processing</p> <p>Function and communication test</p> <p>Iterative process within the estimated work time in order to optimize the reading performance for the application</p> <p>Inspection of static or dynamic reading performance</p> <p>Tests on the sensor interface for the machine or plant with test objects and barcodes provided by the customer</p> <p>Basic training for employees to explain how to operate the SICK product correctly</p> <p>Archiving of product parameters in a SICK database</p>
<b>Documentation</b>	<p>Archiving of product parameters in a SICK database</p> <p>Documentation of reading performance</p> <p>Creation of a commissioning log</p>
<b>Duration</b>	Additional work will be invoiced separately
<b>Note</b>	<p>Interventions in the software and controller of the overall system or the plant are not included</p> <p>Mechanical mounting of the SICK product must be carried out by the customer beforehand.</p> <p>The customer must provide qualified personnel to carry out any necessary changes to the mounting arrangements.</p> <p>Small parts are not included in the range of services</p>
<b>Machine life cycle</b>	<p>Installation</p> <p>Commissioning</p>

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
