Detailed technical data

Features

Product segment	Reflectors and optics
Product	Optical filters
Description	A polarizing filter is used to reduce reflections, e.g., for codes under a film or on glossy surfaces. This allows a better detection of codes.
Suitable for	Lector85x, Inspector85x, Lector85x, Inspector85x
Material	Magnet: NdFeB (neodymium iron boron), Polarizing filter substrate: PMMA
Ambient operating temperature	-35 °C ... +50 °C
Storage temperature	-35 °C ... +70 °C
Dimensions (W x H x L)	10.8 mm
Diameter	80.5 mm
Weight	8 g

Instruction for installation Polarizing filter

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
