Concept of operation

1. Position label or substrate in the active area of the fork sensor

2. Move multiple labels through the fork sensor

Press both the "+" and "–" buttons together, hold > 1 s and than release the teach-in buttons. The red LED flashes.

Press "–" button, teach-in process is finished.

Notes

Switching threshold adaptation:
Only, the first teach-in procedure after switching on is permanently stored. Teach-in can be repeated cyclically. Switching output also during teach-in active.

Once teach-in process is complete, the switching threshold can be adjusted at any time using the "+" or "–" button. To make minor adjustments, press the "+" or "–" button once. To configure settings quickly, keep the "+" or "–" button pressed for longer.

Press both the "+" and "–" buttons together (3 seconds) to lock the device and prevent unintentional actuation.

Press both the "+" and "–" buttons together (6 seconds) to define the switching function (light/dark switching). Standard setting: Q = light switching.

Teach-in (static): Setting the switching threshold without movements of label, cf. operating instruction.
